

Project: Siem Helix 1 & 2 Well Intervention Vessels

Locker Heatshielding were contacted by Crowners Services regarding an extremely urgent requirement they had for Heatshielding the reverse of the cranes on the Siem Helix 1 and 2 Drill Ships to protect the hydraulic jumper hoses, the degreasing of the main crane wire and cylinders. The Heatshields for Helix 1 were required for delivery in Rotterdam within two weeks of the order being taken.

Deliverables

The Heatshields selected for the project were the Locker Mini ES shields which were designed and manufactured to suit the support frame provided and shipped to Rotterdam for integration with the drill ship during preparation for an upcoming well intervention contract.

On completion of the installation of the Heatshield panels the Helix 1 and 2 the vessels set sail for Brazil and are currently undertaking well intervention activities on behalf of Petrobras.
